

KPI-240

- Provides a complete solution for digital CCTV and audio in an IP network for recording, monitoring, reporting and security needs.
- Viconet is a single software application that controls:
 - Recorders - KE/KP Lines
 - Video/Audio transmitters - The KT LINE
 - Phone line transmitters - Quick Silver Line
- Vicon is deployed throughout the whole network site and utilizes the standard IP network - IAN, WAN or internet
- Simultaneous monitoring, playback and recording from anywhere to everywhere
